

# *penergetic g*

## *With the impulse of nature.*

Take advantage of biostimulation with the Penergetic technology for homogeneous slurry and valuable manure.

Save time and money with penergetic g! Stubborn floating layers in the liquid manure are dissolved and the pit agitation effort is minimized. You get homogeneous and flowable liquid manure that can be spread better. The plants are not burned. penergetic g ensures a noticeable reduction in odour through aerobic rotting. Used in the barn, penergetic g provides a better climate for the well-being of your animals.

- ⊕ *Converts ammonia to ammonium*
- ⊕ *Odour reduction*
- ⊕ *Reduces agitation time*
- ⊕ *Homogenization of manure*
- ⊕ *Valuable aerobic fertilizer*
- ⊕ *Eliminates crust and bottom sludge*

\* Approved for organic farming in Switzerland in accordance with FiBL's list of operating resources

*for liquid manure*

*...for intelligent agriculture*

### Application

The product is mixed into the liquid manure. Simple insertion via the agitator, the channels or the slatted floors.\*

### Dosage

**Calcium Carbonate** Barn: 5-10 gr/LSU/Week  
Pit: 1-2 kg/100 m<sup>3</sup>

**Molasses** Barn: 5-10 ml/LSU/Week  
Pit: 1-2 l/100 m<sup>3</sup>

LSU - Livestockunit

### Strong floating crusts

Dissolving of floating crusts and elimination of strong odour

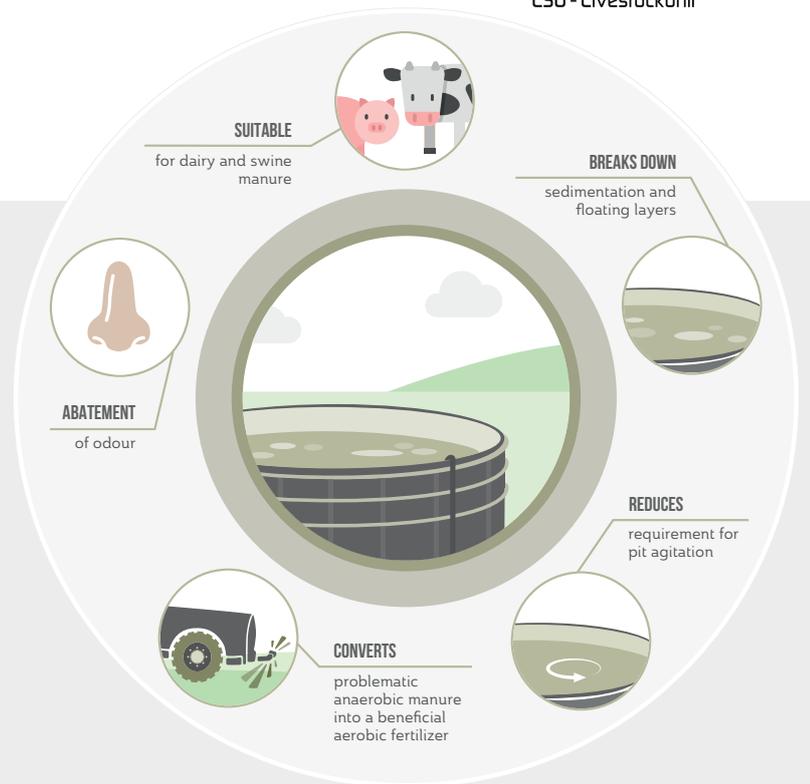

### Thick fertilizer sludge and a putrid smell

Dissolution and improvement after 1 year of Penergetic use

### Improved pig farming and manure

Homogeneous liquid manure, odour reduction and reduced mortality

\* For a mixture, the manufacturer's instructions must be observed. Further information can be found in our Instructions.
